## Assignment 4.2 – Final Project Development 3

### 1. Website Purpose

My website will show off the school projects and coding work I've done. It's a place where people can learn about what I can do, especially if I'm looking for a job or internship.

### 2. Who It's For

The website is for employers who want to see my skills, teachers who want to check my work, and other students who might want to work with me. The site will be simple, quick to use, and work well on phones. I'll also share links to my code on GitHub.

### 3. Website Pages

Home: Quick intro and news

Projects: My work with links

Resume: A file people can download

Contact: A form or email to reach me

### 4. Website Layout

I'll use a simple hierarchical layout:
